Notice Regarding Technical Center Box Issue Fee Mailings

The Office will begin mailing address labels with the PTOL-85, "Notice of Allowance and Issue Fee Due" for patent applications allowed in all Technology Centers. These address labels should be used to ensure proper routing of post-allowance correspondence. This directive supersedes the "Special Boxes for Patent Mail" instruction. Any Notice of Allowance and Issue Fee Due received without the accompanying address labels should continue to be addressed to Box Issue Fee.

Status of Certification Services

On November 28, 1995, the Office published an Official Gazette Notice entitled "Temporary Suspension of At Cost Services for Orders for Certified Copies" (1180 OG 121) to advise practitioners and the public of delays in filling orders

for certified copies of PTO documents. This is an update of actual calendar days to mail for orders filled during the month of January 1999:

Trademark Application-As-Filed, Regular	17	7
Trademark Related File Wrapper	25	23
Trademark Assignments	10	5

*** Includes turnaround times for files on official search and file reconstruction.**

During the month of January 1999, a total of 8,256 orders (15,851 copies) were filled and closed, or 248 orders less (1,711 copies less) than the FY-99 planning number of 8,504 orders (17,562 copies) to be closed for this month. While total output (orders and copies) was lower than planned during January, the fiscal year-to-date totals for both orders and copies filled are on target. The average turnaround times for products have returned to expected ranges.

Due to varying availability of media, customers will not be advised when orders are not delivered within the published goal periods. However, customers will be advised if any unexpected delay in their order has been identified. Customers should use the above actual days to mail for each product as a guide as to when they can expect their orders. In determining expected delivery times, the day an order is received in the Office is calculated as "day zero." The next business day is "day one."

Delivery of any specific copy will vary based on the availability of scanned images, microfilm products, and/or file accessibility. On June 10, 1997, the Office published an Official Gazette Notice entitled "Changes in Practice in Supplying Certified Copies and Filing Receipts" (1199 OG 39) which advised customers who place orders for certified copies of patent applications-as-filed not to request them until the official filing receipt is received; images and related bibliographic data are not available to Certification Division until the filing receipt is generated by the Office of Initial Patent Examination.

Customers are encouraged to fax orders for copies directly to Certification Division at (703) 308-9759 and to pay by PTO Deposit Account, MasterCard, Visa, American Express or Discover. Information on the status of pending orders may be obtained by calling (703) 308-9726 or 1 (800) 972-6382 (outside the Washington, DC Metro area), or via E-mail: certdiv@uspto.gov.

Patents to Issue More Quickly After Issue Fee Payment

As part of the Patent and Trademark Office's changes in business practices to streamline its processing of patent applications, and thereby maximize patent term of patents, the PTO has established an objective to issue patents within four weeks of payment of the issue fee by July of 1999 instead of the current average of three months. To achieve this objective, the PTO has changed its processes for publishing patents. In the past, the process of electronically capturing the information to be printed in a patent was not begun until the issue fee was paid and formal drawings were filed. With the old process, correspondence submitted after allowance but before payment of the issue fee did not delay the patent issue process. Under the new process, however, electronic capture of most of the information to be printed in a patent shall begin as soon as an allowed application is received in Office of Patent Publication, which is well before the issue fee is paid. Furthermore, under the new process, assignee and attorney information are taken from the issue fee transmittal form, PTOL-85B, when the issue fee is paid, and after most of the patent document has been compiled.

Any amendments, information disclosure statements, and corrected or formal drawings that are filed after allowance of the application complicate preparation of the patent document and will, most likely, delay issuance of the patent. Accordingly, applicants are encouraged to make an effort to file drawings suitable for printing (i.e. formal drawings) with the application on filing and to file papers such as amendments, information disclosure statements, and corrected or formal drawings, as soon as possible during examination. If the papers are not filed until after allowance, applicants are encouraged to file the

papers within one month after a Notice of Allowance has been received in order to minimize disruption to the printing process.

Today, many papers are filed in allowed applications that unnecessarily delay the issuance of the applications as patents. For example, if a request for a corrected filing receipt is filed after allowance, the application must be taken out of the printing cycle to process the request and issue the corrected filing receipt even though a corrected filing receipt is NOT needed to ensure that the patent is printed without the errors of the filing receipt. A corrected filing receipt is not necessary for correct printing because the inventors' names, the title of the invention and any priority information are separately captured by the data capture contractor from documents within the application file wrapper and not from PALM data (which is used to generate the filing receipt). The inventors and the spelling of their names are taken from the originally filed executed oath or declaration or any later filed papers correcting the information thereon. The title of the invention is taken from the application papers and any amendments. Foreign priority information is also taken from the oath or declaration.

The processing of requests for corrected filing receipts delays the issue process and because such corrected filing receipts are not needed in order to have the correct information printed on the patent. In view of this and the fact that filing receipts are now generated earlier in the application process (see *Changes In Practice In Supplying Certified Copies And Filing Receipts*, 1199 O.G. 38 (June 10, 1997)), the PTO is changing its practice with respect to requests for corrected filing receipts. The new practice is that corrected filing receipts will not be mailed after the date of mailing of a Notice of Allowance and Issue Fee Due unless special circumstances exist which compel such action.

The duplicate submission of amendments may also delay the issue process. If an amendment is faxed to an examiner to put the application in condition for allowance, that faxed amendment is entered in the file as an official paper. The application is subsequently allowed and forwarded to publication. If a duplicate amendment is mailed to the PTO, it must be matched with the file, and this results in the application being extracted from the issue process. The Office must then determine whether the paper is in fact a duplicate. This may delay the issuance of the patent, especially when the duplicate amendment is submitted with or after payment of the issue fee. Even when an application is not in the issue process, the same correspondence should not be mailed and faxed to the Office, since the Office practice, in general, is to discard the duplicate copy once it is determined that the paper is a duplicate. Duplicate filing of papers only cause delays and confusion, unless the duplicate has been specifically required by the Office. See Manual of Patent Examining Procedure, Section 719.01(a).

If there are any questions or comments about this change in practice, they should be forwarded to Charles Hall, Program Analyst, Systems and Contracts Division, Office of Patent Publication, by facsimile at (703) 305-4372, by telephone at (703) 305-8354, or by e-mail at charles.hall@uspto.gov.

Reference Collections of U.S. Patents and Trademarks Available for Public Use in Patent and Trademark Depository Libraries

The following libraries, designated as Patent and Trademark Depository Libraries (PTDLs), receive patent and trademark information from the U.S. Patent and Trademark Office. Many PTDLs have on file patents issued since 1790, trademarks published since 1872, and select collections of foreign patents. All PTDLs receive both the patent and trademark sections of the *Official Gazette of the U.S. Patent and Trademark Office* and numerical sets of patents in a variety of formats. Patent and trademark search systems in the Cassis CD-ROM series are available at all PTDLs to increase access to that information. It is through the CD-ROM systems and other depository materials that preliminary patent and trademark searches may be conducted through the numerically arranged collections.

Each PTDL offers reference publications which outline and provide access to the patent and trademark classification systems, as well as other documents and publications which supplement the basic search tools. PTDLs provide technical staff assistance in using all materials.

All information is available for use by the public free of charge. However, there may be charges associated with the use of on-line systems, photocopying and related services.

Since there are variations in the scope of patent and trademark collections among the PTDLs, and their hours of service to the public vary, anyone contemplating use of these collections at a particular library is urged to contact that library in advance about its collections, services, and hours in order to avert possible inconvenience.

Partnership PTDLs provide enhanced and expanded services for which fees are charged. They offer on-line patent text and image searching, on-line trademark searching, and videoconferencing for examiner interviews and workshops. They accept disclosure documents on site, order file wrappers, assignment documents and certified copies for their customers, and host a variety of seminars aimed at specific audiences, including practitioners, paralegals, and independent inventors. Currently, partnerships are located at the Great Lakes Patent and Trademark Center (GLPTC) at the Detroit Public Library in Detroit, Michigan and the Sunnyvale Center for Innovation, Invention and Ideas (SCI[3]) in Sunnyvale, California.
